TECHNICAL STATEMENT
WMRN(FM), FACILITY ID 52042
CITICASTERS LICENSES, INC., INC.
RADIO MULTIPLE OWNERSHIP ANALYSIS 11/05/2002

This statement and the attached figures were prepared on behalf of Citicasters Licenses, Inc., Inc. ("CLI"), a licensee subsidiary of Clear Channel Communications, Inc. CLI proposes to modify the facilities of WMRN(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Programmed Stations Studied

Call Sign	City	State	Freq
WZNW	COLUMBUS	OH	1230
WTVN	COLUMBUS	OH	610
WMRN-FM	MARION	OH	106.9
WFJX	HILLIARD	OH	105.7
WNCI	COLUMBUS	OH	97.9
WQIO	MOUNT VERNON	OH	93.7
WCOL-FM	COLUMBUS	OH	92.3
WFCB	CHILLICOTHE	OH	93.3

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules¹.

CLI **does** not have an attributable interest in any other station with a principal community contour that overlaps or intersects the existing facility of WMRN(FM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form two "radio markets," as shown in **Figure 1**, for analysis under the Commission's rules.

¹ see 47 C.F.R. § 73.3555.

Radio Market "1" is defined by the mutually overlapping principal community contours of WMRN(FM), WQIO(FM), WNCI(FM), and WTVN(AM). The predicted principal community contours of these stations (3 FM, 1 AM) are shown in Figure 1.

Radio Market "2" is defined by the mutually overlapping principal community contours of WMRN(FM), WEJX(FM), WCOL-FM, WNCI(FM), WZNW(AM) and WTVN(AM). The predicted principal community contours of these stations (4 FM, 2 AM) are shown in *Figure 1*.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market "1" studied herein, there are over 50 radio stations, including the subject co-owned stations that overlap or intersect with the defined "radio market." *Exhibit 1* is the tabulation of the radio stations identified in the market.

In Radio Market "2" studied herein, there are over 50 radio stations, including the subject co-owned stations that overlap or intersect with the defined "radio market." *Exhibit 1* is the tabulation of the radio stations identified in the market.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contour⁶ for **AM** stations were predicted using the antenna patterns as identified in the Commission's **AM** database and the appropriate Ground Wave Field Strength versus Distance Graph of **47** C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of **47** C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham

FCC Engineering Specialist
Citicasters Licenses, Inc, Inc

Figure 1

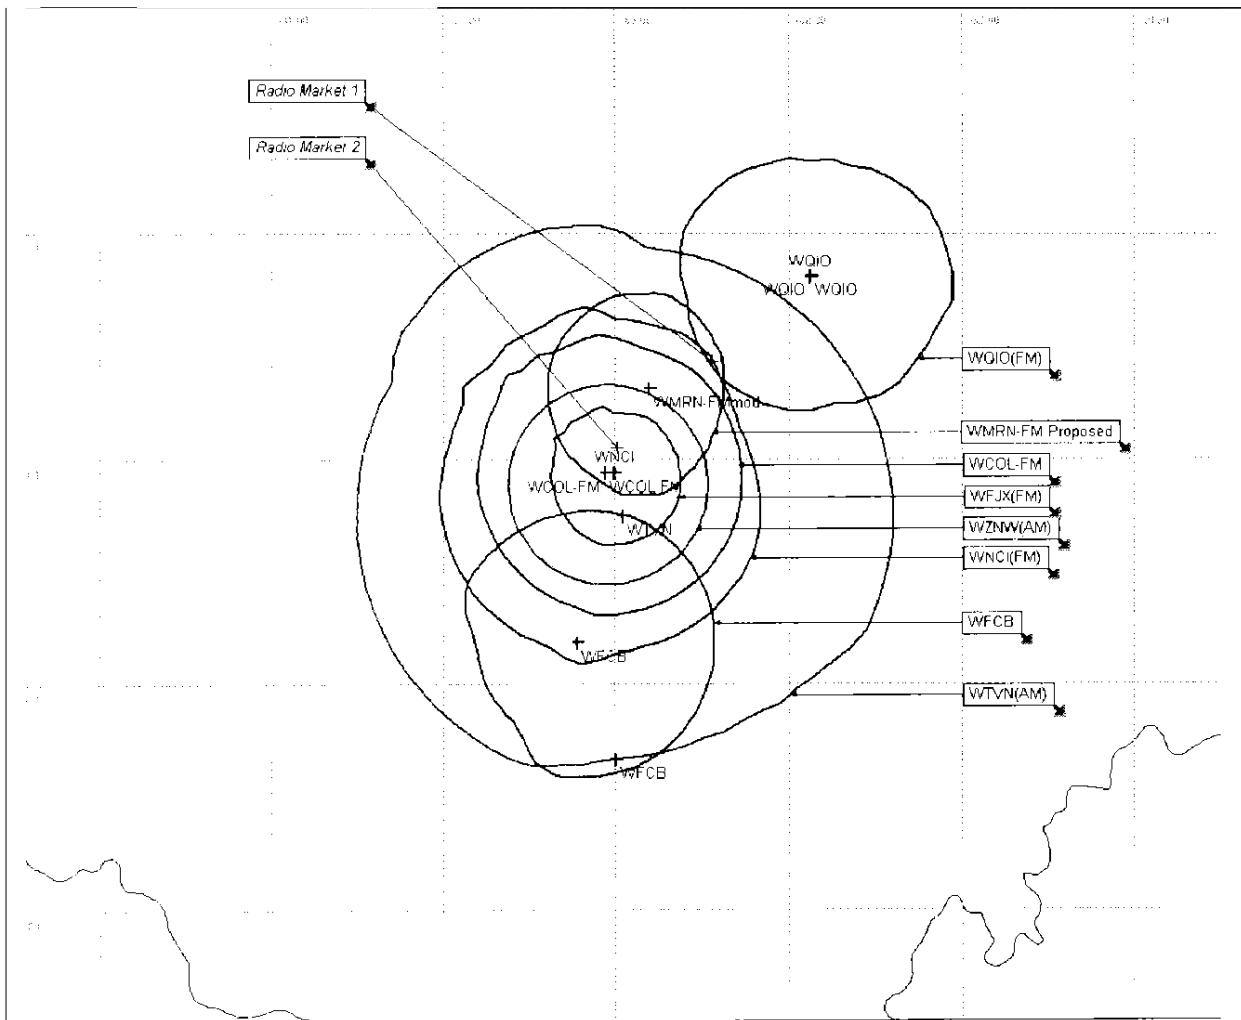

Exhibit 1, Count of Stations in Market

Because co-owned station WTVN (AM) Columbus, OH is common to all "radio markets" this tabulation is of stations with principal community contours that overlap in whole or in part the principal community contour of WTVN. Two tables and maps are a part of this exhibit. Table 1, and Figure 1 of this exhibit depict only AM stations with overlapping contours, while Exhibit land Figure 2 of this exhibit depict only FM stations with overlapping contours.
